

EdgeHD
CGEM
800HD
8" f/10

\$2399

See the Universe in high definition with Celestron EdgeHD.

- Celestron EdgeHD optics reduce coma.
- Built-in dual-element field flattener produces a focal plane far flatter than any competing coma-free design and over three times flatter than a standard Schmidt-Cassegrain.
- Smaller, more concentrated stars improve resolution and limiting magnitude.
- Sharply focused images across the full field show unsurpassed high definition detail from edge to edge, both imaging and viewing.
- Unique Fastar-compatible optics allow imaging down to an ultra-fast f/2 focal ratio with optional accessories.
- EdgeHD optics are available in 8", 9¼", 11", and 14" optical tubes and in complete scopes on Celestron CGEM and CGE Pro mounts.

Save \$100 to \$200 on Celestron NexStars.

Celestron NexStar SE go-to scopes are four of the best values in backyard astronomy. At their new lower prices, a *Celestron NexStar is a better deal than ever before!*

- Point a NexStar at any three bright stars. Its *SkyAlign* computer automatically lines up on the night sky to find and follow *over 40,000* celestial objects for you. You don't even have to know which star is which.
- Their Starbright XLT multicoatings are brighter, to let you see more and see it better.
- Lightweight. Easy to transport and set up.
- Runs off inexpensive flashlight batteries.
- Has a stainless steel tripod, quality Plössl eyepiece, red dot finder – everything you need to start observing is in the box.

The Celestron NexStar SE – *clearly better than ever!*

- NexStar 4 SE**, 4" Maksutov-Cassegrain, was \$599, now **\$499**
- NexStar 5 SE**, 5" Schmidt-Cassegrain, was \$799, now **699**
- NexStar 6 SE**, 6" Schmidt-Cassegrain, was \$999, now **799**
- NexStar 8 SE**, 8" Schmidt-Cassegrain, was \$1399, now **1199**

Celestron
NexStar 6 SE
6" go-to SCT

was
~~\$999~~
now \$799!
