Reconciling the desire for a large aperture telescope with the reality of a limited budget is an age-old problem. But it's a problem with an easy answer: Sky-Watcher Flextube collapsible Dobsonians.

Sky-Watcher Dobsonian telescopes deliver high-quality optics, huge aperture, solid construction and superb value. And only Sky-Watcher Dobsonians provide the extra portability and convenience of collapsible optical tubes. If you're looking for a big light bucket with a little price tag, look no further! Sky-Watcher has what you need.

With apertures ranging from the ultra-portable 200mm up to our 300mm model, all Sky-Watcher Flextube collapsible Dobsonians come complete with a Crayford-style focuser, two Super Plössl eyepieces and finderscope.

For those looking for a more compact alternative, our Heritage tabletop Dobsonians provide generous apertures in grab-and-go packages. Comes complete with eyepieces and red dot finder.

For more information about the Sky-Watcher line of Flextube collapsible Dobsonians, just visit www.skywatcherusa.com.
